PROFESSIONAL SUMMARY

Java Spring Boot Developer with 1+ year of experience in banking applications. Skilled in building and maintaining REST APIs and backend services. Experienced in service-layer changes, endpoint updates and SQL-based debugging, reducing incident-triage time by 30%. Built two secure Spring Boot projects with JWT authentication and MySQL. Seeking a backend role to build reliable, secure systems.

TECHNICAL COMPETENCIES

- **Languages:** Java, SQL, Python
- **Backend:** Spring Boot, Spring MVC, Spring Security (JWT), Spring Data JPA, Hibernate, REST APIs
- **Database:** MySQL, PostgreSQL
- **Tools:** Git, GitHub, Maven, Postman, Linux/UNIX
- **Frontend (basic):** HTML, CSS, JavaScript, React.js, Tailwind CSS

PROFESSIONAL EXPERIENCE

Associate System Engineer | Tata Consultancy Services (TCS) 05/2025 – 10/2026
Mumbai

- Resolved 15-20 production incidents weekly within SLA using logs, API responses and SQL analysis, cutting triage time by 30%.
- Implemented change requests in Spring Boot banking applications: entity updates, endpoint changes and service-layer logic.
- Supported a Regulatory Reporting Tool (RRT) for a banking client, fixing defects and validating report data.
- Collaborated with Development, QA and Infrastructure teams in an AMS environment.

PROJECTS

Banking Application
https://github.com/Emmanuel-3003/Bank-App
Tech Stack : Java 21, Spring Boot, Spring Data JPA, Hibernate, MySQL, Maven, ModelMapper, Bean Validation

- Developed 10+ RESTful APIs across 3 modules (customers, accounts, transactions) using a layered Controller-Service-Repository architecture with DTOs, ModelMapper and Jakarta Bean Validation.
- Secured the APIs with Spring Security and JWT authentication, with passwords hashed using BCrypt.
- Implemented double-entry transfer processing with deposits, withdrawals and Spring @Transactional management to keep account balances consistent.
- Modeled customer-account relationships and account lifecycle states with JPA/Hibernate, and added centralized exception handling, pagination, sorting and environment-variable-based credentials.

E-Commerce Backend Application
https://github.com/Emmanuel-3003/E-Commerce
Tech Stack : Java 17, Spring Boot 3, Spring Security, JWT, Spring Data JPA, Hibernate, PostgreSQL, Maven, Swagger

- Developed 20+ RESTful APIs across 6 modules (authentication, category, product, cart, address, order) using a layered Controller-Service-Repository architecture with DTOs.
- Implemented JWT authentication and role-based access control (RBAC) for 3 roles (User, Seller, Admin) using Spring Security.
- Designed a PostgreSQL schema with JPA/Hibernate and added pagination, sorting, keyword search and image upload, with API documentation in Swagger/OpenAPI and testing in Postman.
- Built cart and order workflows with quantity management, multiple shipping addresses per user and order placement against a selected payment method.

EDUCATION

Bachelor of Engineering (B.E.), Computer Science & Engineering 2020 – 2024
Chandigarh University Chandigarh
GPA: 7.84/10
